Profile

Project manager who used to write the code. I lead software teams under CMMI level 3 and 5 practices, from requirements gathering to client acceptance, and I use data to improve how teams deliver. I studied multimedia engineering, worked as a full-stack developer, and contributed to my company's CMMI level 5 certification in 2026. Bilingual in Spanish and English.

Experience

Project Manager
Nov 2024 – Present
Mediaérea

I manage software projects for public-sector clients and internal platforms, with cross-functional teams of developers, QA and UI/UX, under CMMI level 3 and 5 practices.

- **Delivery:** iteration planning, estimation with complexity and function points, risk and change management, and closing requirements in formal acceptance sessions with the client. Original scope delivered on time.
- **Data-driven improvement:** root cause and statistical analysis of project indicators. My corrective actions raised defect detection in peer reviews (0.29 → 1.12, $p < 0.001$) and cut rework by 88.7% ($p = 0.005$).
- **Organization:** contributed to the company's CMMI level 5 certification (July 2026) by updating procedures, training PMs, developers, QA and technical writers, and presenting practices at the appraisal. I lead the internal project management platform used company-wide, including AI-assisted effort tracking for estimates.

Junior Django Developer
May 2024 – Nov 2024
Innovation Workshop · Remote

- Built Django solutions and user interfaces with HTML, CSS and JavaScript; REST APIs with Django REST Framework and system maintenance.

Full-stack Developer
Jun 2023 – Nov 2024
Mediaérea

- Developed backend solutions in Python and Django and front-end interfaces with Bootstrap, HTML, CSS and JavaScript on the Metronic framework.

HR Intern, Backend
Jun 2023 – Jan 2024
5CA

- Configured HR systems in SAP SuccessFactors.

Player Support Representative
Mar 2022 – Jun 2023
5CA · Remote

- Bilingual (English and Spanish) technical and account support by chat and email.

Personal project

Misidoku, cat logic puzzle for Android
Oct 2026 – Present
misidoku.site

- Built solo with AI agents (Claude Code), directed like a team: phased work plan, decision log and a definition of done backed by 5,000+ automated tests.
- Flutter app, Supabase backend that replays every game before it counts in the rankings, and a Python generator whose human-style solver guarantees 1,500 boards solvable without guessing.
